2026 UNIVERSAL FORMULARY

Updated October, 2025

This is a simplified guide to the medications most commonly covered by your prescription drug plan. While it highlights many frequently prescribed drugs, it's not a complete list and doesn't guarantee coverage for every medication. To understand your full benefits, including any limits, exclusions, or special requirements, please refer to your Summary Plan Description (SPD). Coverage details like cost, quantity limits, prior authorization, or step therapy may vary depending on your specific plan, and updates can happen throughout the year. We encourage you to talk with your doctor about choosing generic medications when appropriate. Generics are often just as effective as brand-name drugs and can help you save on costs. If you have questions or need help understanding your coverage, we're here to support you.

Specialty drugs are labeled as (SP).

Drugs labeled (PA) require your doctor to complete a prior authorization form. This means that you will need to get approval before you fill your prescription. If you don't get approval, we may not cover this drug.

Drugs labeled (ST) require step therapy. In some cases, you will be asked to first try a certain drug to treat your medical condition before we will cover another drug for that condition.
